British More Sober  
Shock to Vatican  
Lindbergh Stunts

—By Arthur Brisbane  
(Copyright 1929)

**T**HE British home office shows the drunkenness is diminishing in Great Britain. There were 9,254 deaths from drunkenness last year, more than in 1921, while in 1928 had the best alcohol record since the world war.

It is true that "England is not becoming dry, but temperate. Instead of spirits the British are turning to beer and light wines. Such a program was suggested for the United States, but it's too late now."

ITALY has celebrated the 50th anniversary of its taking of Rome by Italian troops, putting an end to the temporal power of the Pope.

The fact that Rome continues as usual to celebrate a recent agreement between the Pope and the Italian government, comes as an unexpected shock to the

A laurel wreath, entwined with the colors of Rome, was displayed by Prince Bonaparte-Gaudini, on

## BRITISH BOAT IN DANGER ON INDIAN OCEAN

Freighter on Fire With  
Steamer Racing to Res-  
cue Them on Board

Associated Press Cable

LONDON, Sept. 23.—A fire aboard the British freighter "Sutton Hall" in the southern Indian Ocean has been reported by the steamship "Athens" which last night radioed that she was proceeding at full steam.

The Perth radio station received a message from Captain Fulton of "Athens" dated Sept. 21, reading as follows:

"Present position of 27°32' south; 98°38' east. Sailing all day. No signs of fire excepting all deck rooms affected being made to rescue those on board the Sutton Hall, which is at fire. Five miles southeast from the Perth radio station received a message from Captain Fulton of "Athens" dated Sept. 21, reading as follows:

"The Sutton Hall is 4,495 tons. She left London on September 3 for Adelais."

## Honor Guest

GENERAL HIGGINS, leader of the Salvation Army, who is to speak at the luncheon given by the commandant general of the city. Tonight he will be the guest of honor of the province, and later at a meeting in Mcdowell church at 8 p.m.

Heavily buying and selling in this stock also featured the markets in Calgary, Vancouver, and Montreal, with Edmonton opening at \$4.00. Monday morning, however, saw a drop in the market with a high of \$4.50.

Despite the fact that the news was not generally known here until Monday morning, crowds were clattering around the better known brokerages in the city Monday morning.

The share of the company advanced as a result of the buying orders which began to pour in, while the rest of the market showed a firm tone at rest, the price of oil remaining which concerned with the fall of the American oil well strike.

A few lucky ones—who were either on the inside track, or had Lord Lack perched their right shoulder—set in while the getting was getting, and others who were not so fortunate were left to wonder.

Stobie-Forsling company, and were being quoted at \$3.50 half-hourly, or \$3.75 per barrel around the \$3.25 mark, J. W. Preston, of this com-

pany, said.

GENERAL HIGGINS IS EXPERIENCED

G. R. Gilligan, of the well-known Canadian newspaper, "The Star," noted that there had been a brisk demand for "Athens" tickets, and that the price ranges as much above a clearer idea of the situation could not be obtained from the Calgary stock exchange opened.

A pronouncement was made for the present time by a special dispatch

### PREPAREDNESS

The Trades and Labour council urges the provincial and civic authorities to make a survey of work which will be idle when the harvesting and threshing and building seasons come. This must be done, if it has not already been put in hand. There are good reasons for not broadcasting plans to provide employment in the quiet season. But the situation should be carefully watched, and a return of the condition in which we can meet with the least waste of time and money.

### WHAT LOW GRADE WHEAT MEANS

Trade figures show that during the last five months imports into Canada increased by about forty millions of dollars, while exports decreased by about thirty, decreased thirty-seven millions, compared with the corresponding period a year ago. On the face of it that is an unsatisfactory trend of things, pointing to the disappearance of the market, and to a return of the condition in which we were buying abroad more than we sold.

The shrinkage in imports, however, is more than offset by the increased value of our exported wheat, which showed a drop of fifty-seven millions. This does not mean that less wheat was shipped out, for last year's crop was the biggest ever. But the quality was poor, and the price low. The slump in the money value of our exports is thus a striking illustration of the difference it makes to the country's trade and financial welfare whether the western crop happens to grow high or low.

### COAL STEAGING A COME-BACK

In the September number of the Scientific American there is a most interesting article on electric power produced by steam, by Mr. R. M. Boykin, president of the North Western Electric Light Company, and general manager of Puget Sound Power and Light Company, which is installing a \$5,000,000 steam plant on Lake Washington, Seattle. During the years from 1910 to 1930, it is estimated the increase in western coal will total only 5,660,000 horse, whereas power generated by steam will show an increase of 13,225,000 horsepower. The basis of this rapid growth is founded on economy of operation, and the authority said that Thomas Edison, who recently said: "Electric power can now be generated cheaper by steam than by water."

This is good news for Vancouver Island, with her great coal resources. With the progress made and economic perfection lately attained by high pressure steam turbines, and the use of large units under boilers built on the unit system, the increased consumption of coal would appear to be assured. Last year the United States used coal this way more than 15,000,000 tons, and of course, those who are interested, Mr. Boykin's article contains many facts and items of importance.—Victoria Daily Times.

### FIRE PREVENTION

THIRTY YEARS AGO

Supt. Perry is to relieve Supt. Moul in command of the fire department of the Mounties. He will be succeeded by Capt. J. H. Hart, who has been taken into his confidence to proceed to the new post.

M. B. Williamson, son of Wm. Williamson, who died last Friday for Leaser Lake on Tuesday.

A car load of lead mining machinery arrived from the Dering Co. yesterday.

The celebration of the golden jubilee of Rev. Father P. J. O'Farrell, pastor of St. Peter's church—will take place on Monday next.

A car load of men from Red Deer will be running in about ten days.

### Twenty Years Ago

Ottawa—Hon. Frank Cochrane is dead.

The Governor General and party yesterday paid their respects to the late Sir George Macdonald, who had been engaged in benevolent work.

John G. Smith has been appointed clerk of the court at Wetaskiwin.

If these regulations are to be made the safeguard that they should be, there will be no room for some in the law to claim giving the fire marshal power to enter upon private premises, inspect them, warn owners and occupants of danger points, and, if necessary, take action to prevent consequences representative in the law for a few days.

There is nothing truly valuable which can be purchased without pain and labour.—Joseph Addison.

*Business is full of promise till men get it, and then it is all trouble.* —Henry Ward Beecher.

*Business is full of promise till men get it, and then it is all trouble.* —Henry Ward Beecher.

the business of somebody to see that they are cleared.

The new bylaw goes farther than has yet been attempted in the way of interfering with the liberty of the individual to maintain what conditions he may please on his own premises. There is no way of telling what the result of the new bylaw is to be gained. Edmonton's fire record for the last year, and the series of conflagrations which have wiped out the towns and districts of half a dozen Alberta towns during the past year, absolutely the idea that the community has no right to say that the individual shall not maintain a fire-trap if he wants to.

Council ought to pass the bylaw promptly, with any amendments which appear to be necessary in the interests of safety; and then make provision to see that the bylaw will mean what it says.

### Truth Seeking BY EDGAR A. GUEST

"I want to know the truth!" he cried. "Tell me the facts! I will be brave. Forgive me if I am not so bold." "So I am not to be a slave. Not for a moment, I suppose. Unless I absolutely know."

"That two and two make four," he said. "I know it is true beyond a shadow of a doubt. It has been tested out." "But you do not know that the only way that four is got."

"This 'four' you will call the absolute. Can still in other ways be made. Who is to say? You can find pretences to a shade. And then you can find a way to make it look like a lie."

"In spite of all the doctrines preached in the world, our endures plain. The world is not yet dead. Unstirred and unchanged remains. And the world is not yet dead. By whom a man can come to four."

### Healthy Teacher BY GLENN FRANK

Education is more a matter of contagion than we sometimes think.

Happy and healthy-minded teachers spread healthy-mindedness in the schools of the United States. The Bureau of Education gives the teacher the right to teach, and the right to keep happy and healthy.

But there are other influences besides the schoolroom, to make of them little more than a bunch visiting the wigwam of dust caption upon their heads, and leaving behind a trail of dirt and filth.

## Fall Criminal Court Opens With Dramatic Trial

### GRIM MURDER CHARGE FACED BY ALBERTAN

Lonely Snow-covered Trail in North Was Scene of Tragedy

A lonely snow-covered trail in the northland. Nothing in sight save a single drawn by a team of trotting horses. A lone rider, a man, one of the members of a half-dozen family bound on a long winter trail through the arduous of the winter days. Suddenly the rider stopped, took off his hat, and laid it hand, lying was the party just ahead. The young driver, pain, his tears, his grief, his despair, all the top of his voice, for he knows the distance, the time, the place, the scene, seen from whence they come.

The old man sitting in the bottom of the saddle, his hands clasped over his chest, exclaims: "I shot," pointed forward, "and I'm sorry." Then he opens his chest. One of those tragic ironies of life.

As a result today, in the Supreme criminal court, before Mr. Justice D. C. Cole, the trial of a man who is being tried by George Moore, the young driver, for the killing of Norman Ward on February 8, at a point near Macleod in the St. Paul

The jury is made up of the twelve men of the jury, and the two women, Mrs. Johnson, Mrs. Frey, J. L. Slack, and A. G. McLean.

A. G. Williams, of Fort Saskatchewan, is prosecuting on behalf of the Crown.

The story of the unhappy journey was told by the coroner of the crown, Phil Ward, one of the main men of the team, who was driving the team. They were on their way to Fort McMurray, driving along very quickly, making a good speed, when suddenly they had no bells on the horses. After a short time, Ward found the team in a circle, and he found the tracks of a mouse being followed by those of a dog. He stopped the team, and showed that the mice had stopped.

Mr. Gibson said that he would offer evidence that the tracks of the mice were identical to those made by the accused, who made a peculiar turn around the trail, and then turned to his right foot. Phil Ward stated that he had been driving around the district for the last 15 years, and had never seen such a thing.

In the course of cross-examination Dr. D. C. Cole, the witness and Mr. Williams, the prosecutor, struck from behind, the bullet passed through the heart of the man, after a mortal injury, causing the lungs to collapse and the cavity to fill with blood. There were two wounds. There were two wounds in the chest, and both were fractured.

The case is presented.

### Great Change In Life In Far Northland Now

Electric Light, Central Heat and Quick Transportation Completely Alters Matters Says Old Timer

"Life in the north is not so tough today," according to Days McAlpin, a northern old-timer and post keeper for the Hudson's Bay Company for 40 years. "Today we have electric light and central heating in the company's posts and stores. We have a telephone, and almost all north posts will be equipped."

Today the old trail has been taken up, with teams taking four months by dog team, he compared it with the ease and comfort of the three-day drive to the northland, with a team of horses, much to the detriment of dogs, team.

The young driver, pain, his tears, his grief, his despair, all the top of his voice, for he knows the distance, the time, the place, the scene, seen from whence they come.

The old man sitting in the bottom of the saddle, his hands clasped over his chest, exclaims: "I shot," pointed forward, "and I'm sorry." Then he opens his chest. One of those tragic ironies of life.

As a result today, in the Supreme criminal court, before Mr. Justice D. C. Cole, the trial of a man who is being tried by George Moore, the young driver, for the killing of Norman Ward on February 8, at a point near Macleod in the St. Paul

The jury is made up of the twelve men of the jury, and the two women, Mrs. Johnson, Mrs. Frey, J. L. Slack, and A. G. McLean.

After a short time, Ward found the team in a circle, and he found the tracks of a mouse being followed by those of a dog. He stopped the team, and showed that the mice had stopped.

Mr. Gibson said that he would offer evidence that the tracks of the mice were identical to those made by the accused, who made a peculiar turn around the trail, and then turned to his right foot. Phil Ward stated that he had been driving around the district for the last 15 years, and had never seen such a thing.

In the course of cross-examination Dr. D. C. Cole, the witness and Mr. Williams, the prosecutor, struck from behind, the bullet passed through the heart of the man, after a mortal injury, causing the lungs to collapse and the cavity to fill with blood. There were two wounds. There were two wounds in the chest, and both were fractured.

The case is presented.

## WHEAT PROVES ERRATIC WHEN RUMORS FLY

### Bearish News Causes a Slight Drop in Prices

*Canadian Press*

WINNIPEG, Sept. 22.—What started an erratic course on the grain exchanges last week, with wheat and higher levels and ending up at 140 cents, was a little more erratic. Support was never aggressive, but every break induced buying.

Trade in Argentina

dropped areas, but the crop prospects were good.

Wheat prices were up 1 cent per bushel, except for a slight drop in December.

Barley was up 1 cent, oats 1 cent, and rye 1 cent.

Cash wheat trading was good, with a market report for cane.
